IDEA StatiCa Steel – Expert edition

Connection

- Design and code-check of steel connections and joints
- Nonlinear analysis of steel profiles and plates, bolts in tension and shear, welds. 2D or 3D loading
- Rolled, welded or cold-formed sections, predefined cross-sections
- Cuts, stiffeners, wideners, ribs, openings, end plates, fin plates, gusset plates, stubs, cleats
- Connection wizard, EN/AISC/CISC/AU checks, overall report, bill of material, drawings

Code check manager

BIM tool to export and synchronize connections from FEA/CAD programs. Expert edition of IDEA StatiCa Steel contains links with: SAP 2000, STAAD.Pro, Robot, ETABS, SCIA Engineer, Tekla Structural Designer, RFEM, RSTAB, MIDAS Civil, MIDAS Gen, Advance Design, AxisVM, Consteel, Modest, SCADA Pro. Code-check manager is launched directly in the 3rd party applications via a command/icon.

Viewer

BIM tool for sharing models - any project created in IDEA StatiCa Connection can be opened and viewed via the Project viewer. Subsequently, bill of material and 3D DWG can be created, including bill of material. This tool can be used freely by all stakeholders in the connection design process with no need of IDEA StatiCa license.

Connection lite

Simplified and fully cloud-based version of IDEA StatiCa Connection. It provides design and code-check of predefined set of steel connections and joints (app. 300). Currently running in BETA.

IDEA StatiCa Steel – Enhanced edition

Everything in the Expert edition plus following features:

- General cross-sections
- Stability and buckling
- Stiffness
- Joint design resistance
- Member capacity resistance
- Links with Tekla Structures, Advance Steel and Revit

Note: steel applications „CSS“, „Frame“, „Column“ and „Beam“ are no longer supported and come as a FREE bonus with every purchase of IDEA StatiCa Steel product.

IDEA StatiCa Detail

Reinforcement and code-check of walls and beams details (in 2D) - dapped ends, openings, hangings, brackets, diaphragms, frame joints etc. All ULS and SLS checks according to EN/ACI.

Non-linear analysis performed in the background. Stress and strain determined by modified compression field theory.

Reinforcement results based on tension chord model. Crack and deflection checks. Compression softening.

Tension stiffening. Automatic detection of optimal reinforcement position.

IDEA StatiCa Concrete – Expert edition

RCS

- RC cross-section, general/predefined – EN 1992-1-1, EN 1992-2 plus National annexes, SIA 262
- Design of 1D/2D RC members, All ULS/SLS checks

Beam

Design and code-check of concrete beams of various topologies. Non-linear deflections.

BIM Designer / Code-check manager

BIM Tool to import models from FEA programs: AxisVM, Robot Structural Analysis, SCIA, RFEM, MIDAS, Nexis, etc.

IDEA StatiCa Concrete – Enhanced edition

Everything in the Expert edition plus application Detail

IDEA StatiCa Prestressing – Expert edition

Everything in the Concrete Expert edition plus following features:

- Prestressed and Reinforced concrete members (excl. Detail)
- Prestressed concrete cross-section, general/predefined
- Pre/post tensioned members, 3D beam
- Tendon shape, losses, prestressing effects
- Construction stages, Time dependent analysis
- Composite concrete-concrete section
- EN 1992-1-1, EN 1992-2 plus National annexes, SIA 262
- Design of 1D RC/PC members, long-term deflections, buckling.

IDEA StatiCa Prestressing – Enhanced edition

Everything in the Prestressing Expert edition plus following features:

- Continuous composite beam
- Non-linear creep

Note:
Concrete applications „Slab“, „Corbel/bracket“, „Column“ and „Frame 2D“ are no longer supported and come as a FREE bonus with every purchase of IDEA StatiCa Concrete/Prestressing product.

Network version – 25%

Additional fee for network license. Maintenance is then calculated from the increased price.

Upgrades – 20%

- Upgrade to the new version of the same product (for example IDEA StatiCa Steel Enhanced) is calculated as 20% of the list price of the product. Upgrade fee is charged for each version skipped by the customer. For example, upgrade from version 7 to 9 is 40%. Maximum upgrade cost (for multiple versions skipped) is 80%.
- Upgrade to a higher edition (for example from Expert to Enhanced) is calculated as a difference between those two list prices. Standard upgrade fee to get to the newest version is then charged on top of it (20% per version)

Software protection – FREE

Licence is delivered via email - activation key and license file. Can be both single and network.

Hardware protection – 149 / 299 €

Hardlock dongle - either USB key (149 EUR) for single licenses or HASP key (299 EUR) for network licenses.
